

Music Instruction Develops Intelligence

Come Be a Part of the Band!

MIDI for Kids is an innovative year-long program which teaches music while developing higher level thinking skills and extending curricular concepts including math and language. The curriculum uses both music and technology to entice the student into the learning process. In addition to developing a love for music, students learn basic life strategies such as teamwork, cooperation, and decision making as they participate within a musical ensemble. Lessons are held weekly and include building keyboard skills, singing, moving, improvising, creating, playing by ear, reading notation and connecting musical concepts to other subjects such as math and language!

Need more details before you vote? Read on...or visit the website www.midiforkids.com.

- Classes are on the school premises with a MIDI for Kids certified teacher.
- Fun and exciting - Kids are motivated by other kids and fascinated with the "technology" side of music in small **KEYBOARD** classes using state-of-the-art MIDI equipment as well as a unique and innovative curriculum.
- Classes are 45 minutes in length and meet once a week.
- Affordable Tuition and Materials- \$65 per month plus an annual enrollment and registration fee (payment plans available upon enrollment).
